PROFESSIONAL SUMMARY

Detail-oriented aspiring web developer with a solid foundation in Information Technology and hands-on experience in full-stack development. Proficient in JavaScript, CSS, and backend integration, with a strong commitment to building user-friendly applications. Eager to leverage AI tools for efficient coding and problem-solving in a collaborative environment.

WORK HISTORY

IT Intern – Fullstack Web Developer2026
PNP Maritime Group

- Designed and developed the backend architecture of the PRS Memo Tracking System using Python, significantly improving document management workflow and data retrieval.
- Played a key role in the Maritime Vessel Inventory System (MVIS) by implementing database structures and integrating backend functionalities to enhance operational data management.
- Collaborated with stakeholders to gather requirements and provided input into the design of user-centered web applications, ensuring seamless user experiences.
- Executed thorough testing and debugging processes, guaranteeing high reliability and performance of web applications.
- Produced comprehensive technical documentation and user manuals to ensure smooth knowledge transfer and system maintenance.

Trainee2026
Accenture Academy – Technology Microsoft Curriculum

- Gained proficiency in AI Fundamentals, SQL, C#, and ASP.NET Core, honing skills applicable in modern web development.
- Developed various applications based on precise technical specifications, mastering both console and web formats.
- Conducted detailed debugging and testing, identifying and resolving issues to enhance software performance.
- Acquired practical knowledge of AI-driven systems and cloud technologies, preparing for real-world application development.

PROJECT HISTORY

Letran Knight Bot – AI ChatBot (GPT-4 API)2024

Kiosk Machine2024

AI-Driven Web-Based TPS for ISO Documentation with Content Evaluation and Redundancy Checker2025

PNP Maritime PRS Memo Tracking System2026

MVIS – Maritime Vessel Inventory System2026

EDUCATION

Bachelor of Science in Information Technology Colegio de San Juan de Letran-Calamba 2022–2026	Basic Education Colegio de San Juan de Letran-Calamba 2009-2021
---	---

SKILLS

Programming: Python, Java, C#, C++, JavaScript, PHP, Frontend Development: HTML, CSS, JavaScript Backend Development: REST APIs, SQL, MySQL, Database Design, Data Validation Security & Cryptography: Authentication & Authorization, Role-Based Access Control, Data Encryption, Password Hashing, Digital Signatures, Cryptography (Python) Frameworks & Libraries: Flask, Flask-SQLAlchemy, Tailwind CSS, Pandas, Android SDK, Werkzeug	Tools & Platforms: Git, Azure Fundamentals, Microsoft Office, Canva, Figma, GitHub, Android Studio, Visual Studio, NetBeans, XAMPP Professional Skills: Team Collaboration, Inter personal Communication, Teamwork, Problem-Solving, Organizational Skills, Software Development Lifecycle
