PROFESSIONAL SUMMARY

Motivated Junior Web Developer with a strong grounding in Information Technology and a keen interest in responsive web applications. Experienced in both frontend and backend development, leveraging skills in Python, HTML, CSS, and JavaScript. Eager to contribute to forward-thinking projects while continuing to grow in a dynamic team setting.

WORK EXPERIENCE

IT Intern - Fullstack Web Developer February 2026 - May 2026

PNP Maritime Group, Camp BGen Rafael T Crame, Quezon City, Metro Manila, NCR, Philippines.

- Designed and implemented user-friendly web interfaces that enhanced user engagement and satisfaction.
- Developed both frontend and backend features for the PRS Memo Tracking System, optimizing document management processes.
- Improved the Maritime Vessel Inventory System (MVIS) interface, contributing to operational efficiency and streamlined backend functionalities.
- Collaborated with stakeholders to gather project requirements, ensure thorough testing, and maintain comprehensive documentation.

Trainee January 2026 - February 2026

Accenture Academy - Technology Microsoft Curriculum

- Acquired programming skills in languages including SQL, Java, and PHP, focusing on developing web application solutions..
- Created customized applications according to project requirements across both console and web platforms.
- Conducted rigorous debugging and testing to guarantee application reliability and performance.
- Explored AI technologies and cloud services, laying a robust groundwork for future web development projects.

PROJECT HISTORY

- Letran Knight Bot - AI ChatBot (GPT-4 API), 2024
- Kiosk Machine, 2024
- AI-Driven Web-Based TPS for ISO Documentation with Content Evaluation and Redundancy Checker, 2025
- PNP Maritime PRS Memo Tracking System, 2026
- MVIS - Maritime Vessel Inventory System, 2026

EDUCATION

Bachelor of Science in Information Technology 2022 - 2026

Colegio de San Juan de Letran-Calamba

Basic Education 2009 - 2021

Colegio de San Juan de Letran-Calamba

SKILLS

Programming Languages: Python, Java, C#, C++, JavaScript, PHP
Frontend Development: HTML, CSS, JavaScript
Backend Development: REST APIs, SQL, MySQL, Database Design, Data Validation
Security & Cryptography: Authentication & Authorization, Role-Based Access Control, Data Encryption, Password Hashing, Digital Signatures, Cryptography (Python)
